Immune Support
REINFORCE THE BODY’S NATURAL DEFENSES

Quality dietary supplements • Research-driven probiotics • Homeopathic preparations
Reinforce the body’s natural defenses

With the arrival of fall and the winter to follow, we must take particular care to sustain our optimal nutritional status. Maintaining vitamin D levels may help to support proper immune function, while supplementing with vitamin C and zinc helps to promote immune response. In addition, probiotic supplementation has been associated with healthy respiratory function.

Seroyal provides vitamins, minerals, probiotics and herbal formulations in a variety of formats. We also offer homeopathic products to address some of the most common concerns specific to the colder seasons.†*

Seroyal is a natural pharmaceutical company that has been dedicated for 30 years to assisting healthcare practitioners restore, rebuild and maintain patients’ health. Seroyal’s GENESTRA BRANDS, UNDA and Pharmax diverse product lines comprise your key source of effective dietary supplements and homeopathic remedies.
Meet HMF Fit for School.
Hello HMF Fit for School.

GENESTRA BRANDS HMF Fit for School supports children’s upper respiratory tract health and immune function using a unique combination of research-driven probiotic strains and vitamin C. Each delicious blackcurrant flavored chewable tablet provides 12.5 billion CFU of proprietary strains, plus 50 mg of vitamin C – the same formulation shown to help maintain schoolchildren’s immune health in a recent clinical trial. HMF Fit for School also includes additional support for cellular immunity with 1000 IU of vitamin D per tablet.*

Cor Defense
DIETARY SUPPLEMENT

Immune support formula*
• Helps to maintain immune function*
• Promotes normal nasal function and immune cell activity*
• Provides 500 mg of bakers yeast (EpiCor®) per dose
• Also includes zinc, the antioxidant vitamin C, and European elderberry flower extract

Cor Defense contains EpiCor®, a proprietary and research-driven extract from Saccharomyces cerevisiae yeast designed to maintain immune function.1-3* Research demonstrates that daily supplementation with 500 mg of EpiCor® promotes mucosal immunity and regulates the infiltration of immune cells into the respiratory tract, which supports normal nasal function.4* Zinc further helps to maintain immune function by stimulating the production of lymphocytes and by increasing their phagocytic activity.4* Cor Defense also includes the antioxidant vitamin C and European elderberry flower extract for additional immune health support.4-9*

Supplement Facts
Serving Size 1 Capsule/ Servings per Container 30

Each Tablet Contains % DV
Vitamin C (ascorbic acid) 25 mg 42%
Vitamin D (cholecalciferol) 50 IU 13%
Zinc (zinc monomethionine) 1 mg 7%

Brewers Yeast
(Saccharomyces cerevisiae) (EpiCor®)
500 mg ♦

European Elderberry (Sambucus nigra) Flower Extract (4:1)

C1000
VITAMIN SUPPLEMENT

High-dose vitamin C and flavonoid combination
• Supports immune function*
• Promotes antioxidant support*
• Promotes vitamin C intake*
• Provides 1000 mg of vitamin C per tablet, plus rose hips, hesperidin, quercetin and rutin

C1000 is a combination of vitamin C and a wide range of bioflavonoids that promotes immune health and antioxidant support.1-4 Vitamin C stimulates the immune system, resulting in increased T cell proliferation and neutrophil movement.4* Research demonstrates that intracellular vitamin C levels in leukocytes decrease naturally with age, which is associated with impaired neutrophil activity.4* However, supplementation with vitamin C in elderly adults may promote phagocytosis in neutrophils and improve antibody-mediated immune responses.4* Recent research suggests that smokers and elite athletes may experience the greatest benefit of vitamin C supplementation due to its potent antioxidant effects.1-4* As the body does not store vitamin C, continuous intake is required.1-4*

D-Mulsion 400 and 1000

**VITAMIN SUPPLEMENT**

**Emulsified vitamin D supplement**
- Supports immune health*
- Promotes vitamin D intake*
- Provides 400 or 1000 IU of vitamin D per drop
- Great-tasting citrus and spearmint flavors (D-Mulsion 1000 only)

D-Mulsion 400 and 1000 provide vitamin D using the proprietary WisdOM-3™ emulsification process for enhanced bioavailability and improved palatability. The vitamin D receptor is found on most immune cells, including T cells, B cells, and macrophages, demonstrating an important interaction between vitamin D and the immune system. Low vitamin D status has been associated with decreased upper respiratory immune function, while vitamin D supplementation has been shown to have beneficial effects on the function of a variety of immune cells. Research demonstrates that vitamin D mediates the proliferation of T and B cells, increases the phagocytic activity of macrophages, and promotes a healthy cytokine balance. D-Mulsion 400 and 1000 are good alternatives for individuals who have difficulty swallowing capsules and are suitable for individuals of all ages.*

D₃ 400 and D₃ 1000 Drops

**VITAMIN SUPPLEMENT**

**Vitamin D in a convenient liquid drop format**
- Supports immune health*
- Promotes vitamin D intake*
- Provides 400 or 1000 IU of vitamin D per drop

D₃ 400 and 1000 Drops come in a convenient, easy-to-use liquid drop format — just one drop contains either 400 or 1000 IU of vitamin D. D₃ 400 and 1000 Drops can be dropped directly into the mouth or mixed into drinks, are good alternatives for individuals who have difficulty swallowing capsules, and are suitable for individuals of all ages. Recent research demonstrates that low vitamin D status is associated with decreased upper respiratory immune function. However, vitamin D supplementation has been shown to have beneficial effects on the function of a variety of immune cells, including dendritic cells, macrophages, and T cells. Research demonstrates that vitamin D mediates the proliferation of T and B cells, increases the phagocytic activity of macrophages, and promotes a healthy cytokine balance to promote normal immune function.*

**D₃ 1000**

**VITAMIN SUPPLEMENT**

**Vitamin D in capsule format**
- Supports immune health*
- Promotes vitamin D intake*
- Provides 1000 IU of vitamin D per capsule

D₃ 1000 provides 1000 IU of vitamin D in a vegetable capsule format. Very few products naturally contain relevant levels of vitamin D, and its synthesis in the skin can be altered by skin pigmentation, clothing, latitude, and sunscreen use. Vitamin D levels also vary depending on the season, with highest levels present during summer and lowest levels present during winter; this pattern also resembles the seasonal variation in immune system health. Low vitamin D status has been associated with decreased upper respiratory immune function, although vitamin D supplementation has been shown to have beneficial effects on the function of a variety of immune cells. In a recent controlled clinical trial involving children, daily supplementation with 1000 IU of vitamin D for 3 months was shown to significantly increase plasma vitamin D levels and promote a healthy cytokine balance. Following supplementation, levels of the cytokines IL-2, IL-4, IL-6, and IFN-γ were all significantly modified.

**REFERENCES**

Scorbatate is a multi-mineral formula that supports immune health with a unique combination of zinc and vitamin C. Zinc is essential to maintaining immune health as it stimulates cell division in lymphocytes and increases their phagocytic activity. As a cofactor for thymulin, a hormone involved in T cell differentiation and function, zinc is especially necessary for T cell proliferation in the thymus. Recent research has shown that low levels of zinc lead to decreased immune cell number and function, including a reduced synthesis of cytokines that function against intracellular bacteria. Low levels of zinc are commonly found in vegetarians, elderly, and pregnant or nursing women due to reduced absorption, insufficient intake in the diet, and increased zinc requirement, respectively. Similarly, the elderly tend to have low levels of vitamin C. The antioxidant vitamin C also stimulates the immune system, resulting in increased T cell proliferation and neutrophil movement. As the body does not store zinc or vitamin C, continuous intake is required.

Adults (19 years and older): Add water or juice to ¼ teaspoon of Scorbatate and mix. Take once daily with a meal, a few hours before or after taking other medications, or as recommended by your healthcare practitioner.

**REFERENCES**

TIM is a multi-vitamin supplement that also contains glandular extracts, including spleen, thymus, and bone marrow. Vitamin A helps maintain immune function by stimulating the development of lymphocytes, including natural killer and T and B cells. As a result, low levels of vitamin A are associated with a decreased ability of macrophages to ingest and destroy bacteria. Zinc further contributes to maintaining immune health by stimulating cell division in lymphocytes and by increasing their phagocytic activity. Recent research has shown that low levels of zinc are associated with decreased immune cell number and function, including a reduced synthesis of cytokines that function against intracellular bacteria. TIM also provides vitamins C and E, the most important antioxidants in aqueous and lipid compartments of the body, respectively. In addition to recycling the stable vitamin E radical, vitamin C also stimulates the immune system, resulting in increased T cell proliferation and neutrophil movement.

HMF Fit for School includes a combination of research-driven probiotic strains and vitamin C that helps to support upper respiratory tract health and immune function in children. In a recent clinical trial, 57 schoolchildren were randomized to receive either a placebo tablet or HMF Fit for School’s probiotic formula plus 50 mg of vitamin C daily for 6 months. Children in the probiotic plus vitamin C group had a significant improvement in upper respiratory immune health; supplementation helped moderate medication use.2* Bacterial balance needs to be maintained for healthy intestines, which selectively allow absorbance and promote the excretion of dangerous substances.1,3 Probiotics reinforce the intestinal epithelial barrier and mediate epithelial permeability by strengthening the integrity of tight junctions.1,4 Probiotics may also improve T and natural killer cell function, phagocytic activity, antibody production, and healthy cytokine production to support optimal immune health.4* In a randomized, placebo-controlled trial involving 22 adults, daily supplementation with a probiotic containing 25 billion CFU from Lactobacillus acidophilus and Bifidobacterium bifidum significantly promoted a healthy intestinal microflora.5,6

- May help promote immune function in children*.
- Includes 12.5 billion CFU of proprietary probiotic strains.
- Provides 50 mg of the antioxidant vitamin C and 1000 IU of vitamin D per serving.
- Chewable tablets with a delicious natural blackcurrant flavor.

HLC Fit for School includes a combination of research-driven probiotic strains and vitamin C that helps to support upper respiratory tract health and immune function in children.* In a recent clinical trial, 57 schoolchildren were randomized to receive either a placebo tablet or HLC Fit for School’s probiotic formula plus 50 mg of vitamin C daily for 6 months. Children in the probiotic plus vitamin C group had a significant improvement in upper respiratory immune health: supplementation helped moderate cytokine levels, including interferon gamma (IFN-γ).* These results are consistent with other studies that have found that **Lactobacillus acidophilus** and **Bifidobacterium animalis** subsp. lactis help maintain upper respiratory tract health.**

Adolescents and Children (4 years and older): One chewable tablet taken daily or as professionally directed.

**Astragalus Combination #1**

**Vegan-friendly multi-herbal combination**
- Provides herbs that may support immune health*.
- Contains astragalus, eleuthero, burdock, red clover and schisandra extracts.
- Convenient liquid format increases patient compliance.

Astragalus Combination #1 is a unique liquid formula that contains synergistic herbal extracts from astragalus, eleuthero, burdock, red clover and schisandra. These herbs have been traditionally used in herbal medicine to promote immune health.1-3 Astragalus and eleuthero may stimulate cell division in lymphocytes, while burdock, schisandra, and red clover may promote a healthy cytokine balance.2-4

Astragalus Tincture

HERBAL SUPPLEMENT

Astragalus formula for immune support*
- May promote immune health*
- Provides 1.5 ml of astragalus root extract per serving (1:4; 375 mg dried equivalent)

Astragalus Tincture provides an extract of astragalus root, an herb used in Traditional Chinese Medicine.1 Astragalus root has been used for more than 2000 years in China and was included in Shen Nong’s Materia Medica, which was written in the Han dynasty.2 Astragalus may enhance the immune system by stimulating cell division in immune cells and by increasing their phagocytic activity.1,3 *

Phyto-gens

HERBAL SUPPLEMENT

Phytotherapy preparation
- Synergistic combination of young shoot and bud extracts

Phytochemistry is a branch of phytotherapy that specifically incorporates plant embryological tissues (buds, young shoots, etc.) containing “plant meristem” cells – undifferentiated, fast dividing cells which contain the plant’s genetic blueprint.1 2 These embryonic tissues are rich in beneficial phytochemicals including: growth factors and plant hormones, enzymes, nucleic acids, oligoelements, and phytonutrients such as polyphenols and flavonoids.1 Embryological tissues are utilized because many phytochemicals are lost in fully developed plants once chlorophyll is formed.1 Additionally, their energetic components are at their highest levels when they are harvested in the spring – the most active phase of the growth cycle.1 4

UNDA Cold and Flu
Homeopathic Preparations
Angiplex provides a combination of synergistic homeopathic remedies specifically formulated to temporary relieve symptoms associated with sore throat, a common cause of physician visits and missed work. Symptoms of sore throat may include lower than normal pitch of the voice or hoarseness, which can last between three and eight days. Sore throat may also be associated with difficulty swallowing, the sensation of a foreign body in the throat, or cough. Each Angiplex tablet provides ingredients that help decrease burning and stinging in the throat, as well as weak, hoarse and croaking voice.

EACH TABLET CONTAINS:
- Aconitum napellus (Aconite) Whole Plant 8X: Dry throat
- Apis mellifica (Honey bee) 8X: Difficulty swallowing
- Arum triphyllum (Indian turnip) Underground Parts 4X: Sore throat
- Belladonna (Deadly nightshade) Whole Plant 8X: Sore throat
- (≤ 1.25 x 10^-10 % alkaloids, calculated)
- Kalium bichromicum (Potassium bichromate) 10X: Sore throat
- Lachesis mutus (Bushmaster) Venom 10X: Throat pain
- Mercurius solubilis (Hahnemann’s soluble mercury) 10X: Sore throat
- Phytolacca decandra (Pokeweed) Root 8X: Sore throat
- X is a homeopathic dilution: see www.seroyal.com/homeopathics for details

Recommended Dose
- Adults and adolescents (12 years and older): At the first sign of symptoms, dissolve one tablet under the tongue every half hour to one hour. When symptoms subside, decrease frequency to every four hours. Once the symptoms are gone, continue taking one tablet daily for three more days.
- Children (under 12 years): Take under the direction of your healthcare practitioner.

Drosera Plex is a synergistic homeopathic preparation specifically formulated to assist with the temporary relief of coughs, one of the primary symptoms presented to physicians. While coughing is a normal defense mechanism that helps the body clear mucus or aspirated foreign particles, it can also be associated with wheezing, abnormal airways, difficulty eating, and impaired immune and respiratory function. Each drop of Drosera Plex contains ingredients that reduce coughing, including dry, short coughs. By specifically targeting the respiratory system, Drosera Plex helps promote and maintain overall respiratory health.

EACH DROP CONTAINS:
- Arnica montana (Leopard’s bane) Underground Parts 6X: Dry, short cough
- Belladonna (Deadly nightshade) Whole Plant 6X (≤ 1 x 10^-8 % alkaloids, calculated): Cough
- Cina (Wormseed) Flower-heads 6X: Cough
- Coccus cacti (Cochineal) 6X: Cough
- Corallium rubrum (Red coral) Calcareous Exoskeleton 6X: Cough
- Cuprum metallicum (Copper) 6X: Cough
- Drosera (Sundew) Whole Plant 6X: Cough
- Ferrum phosphoricum (Hydrated iron (III) phosphate) 6X: Cough
- Ipecacuanha (Ipecac) Underground Parts 6X: Cough
- Solidago virgaurea (Goldenrod) Inflorescences 2X: Cough
- X is a homeopathic dilution: see www.seroyal.com/homeopathics for details
- Other Ingredients: Ethanol (beet), purified water

Recommended Dose
- To be taken ten minutes away from food. Invert bottle and shake lightly allowing drops to fall directly under the tongue or into ¼ oz of water. Hold contents for about 20 seconds and swallow. To promote drop flow, invert bottle and shake before each use. Dosage frequency may be increased up to six times daily depending on the severity of symptoms.
- Adults and adolescents (12 year and older): Take 10 drops three times daily or as recommended by your healthcare practitioner.
- Children (12 years and under): Take under the direction of your healthcare practitioner.

**Drosera Plex Cough Syrup**

**HOMEOPATHIC PREPARATION**

- **Cough relief syrup**
  - Homeopathic preparation
  - Provides relief of all types of coughs

Drosera Plex Cough Syrup is a unique homeopathic preparation synergistically formulated for the relief of all types of coughs. Cough is one of the primary symptoms presented to physicians worldwide, and is commonly caused by aspirating foreign particles, mucosal damage or postnasal drip. Although coughing is a normal defense process that helps clear away debris and secretions, it can be associated with wheezing, abnormal airways, difficulty eating, and impaired immune and respiratory function. Each teaspoon of Drosera Plex Cough Syrup contains ingredients that help reduce spasmodic, dry or irritative cough, wheezing or incessant cough, loose cough, teasing cough, and barking or croupy cough.

**EACH TEASPOON CONTAINS:**

- **Drosera (Sundew) Whole Plant** .............................................................. MT
- **Ipecacuanha (Ipecac) Underground Parts** .................................................... 3X
- **Origanum vulgare (Wild marjoram) Aerial Parts** ............................................... 4D
- **Papaver rhoeas (Corn poppy) Flower** ......................................................... 2X
- **Sulphur (Sublimed sulfur)** ................................................................... 6X
- **Rumex crispus (Curly dock) Underground Parts** ............................................... 8X
- **Pulsatilla (Wind flower) Whole Plant** ......................................................... 6X

**Echinasyr**

**HOMEOPATHIC REMEDY**

- **Supports a healthy immune system**
  - Homeopathic preparation
  - Helps to maintain natural resistance and defenses

Echinasyr is a homeopathic preparation that contains *Echinacea purpurea*, which supports a healthy immune system and helps to maintain natural resistance and defenses. Research demonstrates that *Echinacea* may promote immune system health by reducing the release of cytokines from immune cells and invading pathogens, including IL-6 and TNF-α. *Echinacea* may also stimulate the phagocytic activity of immune cells and decrease the survival of bacteria. Research demonstrates that *Echinacea* may also decrease the secretion of mucus, thereby reducing mucous production.

**EACH DOSE CONTAINS:**

- **Echinacea purpurea (Purple Cone-flower)** .................................................... MT

Other Ingredients: Sorbitol, glycerin, purified water, Rubus idaea, Ribes nigrum, grape skin extract, benzoic acid, ammonium glycyrrhizinate, citric acid

**Recommended Dose**

- Adults: Take 1 teaspoon (5 ml) two times daily.
- Children: Take 1/2 teaspoon (2.5 ml) two times daily. Or follow the recommendations of your healthcare practitioner.

4.2 fl oz (125 ml) Liquid NDC 62106-1183-2

**REFERENCES:**

Febriplex is a unique homeopathic preparation specifically formulated for the relief of flu-like symptoms. These symptoms negatively impact the respiratory tract, which includes the nose, throat, breathing pathways and lungs. Flu-like symptoms, including sore throat, runny nose, cough and fever, usually last between seven and 10 days, although they can persist for up to three weeks. These symptoms can be debilitating, often decreasing an individual’s ability to perform normal functions, and can be even more serious in the elderly and immunocompromised individuals, as they can lead to more severe complications. Each Febriplex tablet contains ingredients that decrease flu-like symptoms, including cough, cold and fever.

EACH TABLET CONTAINS:

- Aconitum napellus (Aconite) Whole Plant 6X: Fever
- Arnica montana (Mountain arnica) Underground Parts 8X: Fever
- Belladonna (Deadly nightshade) Whole Plant 8X: Cold
- Eupatorium perfoliatum (Boneset) Aerial Parts 10X: Sneezing
- Gelsemium sempervirens (Yellow jessamine) Underground Parts 12X: Sneezing
- Hahnemann’s soluble mercury (Mercurius solubilis) 10X: Cold
- Rhus toxicodendron (Poison Ivy) Young Shoot 8X: Cough

Each tablet contains ingredients that decrease flu-like symptoms, including cough, cold and fever.

Recommended Dose

Adults: At the first sign of symptoms, take one tablet allowing it to dissolve under the tongue. Continue every half hour to one hour. When symptoms subside, decrease frequency to every four hours. Once the symptoms are gone, continue taking one tablet daily for three more days. If symptoms persist more than three days, discontinue use and seek advice from a healthcare practitioner.

Children: Divide tablet in half and follow adult directions.

30 Tablets NDC 62106-9911-3

Muco Coccinum is a homeopathic preparation of bacterial and viral fractions specifically formulated for the temporary relief of cold and flu-like symptoms, including sore throat, runny nose and cough. These symptoms usually last between seven and 10 days, though they can persist for up to three weeks. Cold and flu-like symptoms can be debilitating, often decreasing an individual’s ability to perform normal functions. Colds are also the most common reason for physician visits and missed work or school. Although adults typically get two to three colds per year, the risk may increase due to stress and poor sleep. Additionally, flu-like symptoms may be more serious in the elderly and immunocompromised individuals, as they can lead to more severe complications. Each tablet of Muco Coccinum contains ingredients that reduce symptoms including mucus production, catarrhs and exhaustion.

EACH TABLET CONTAINS EQUAL PARTS OF:

- Branhamella catarrhalis (Mucotoxin) 200K: mucus, catarrhs
- Influenzinum 200K: exhaustion
- Klebsiella pneumoniae 200K: fever, chills
- Micrococcus tetragenus 200K: mucus, catarrhs

K is a homeopathic dilution: see www.seroyal.com/homeopathics for details.

Other Ingredients: Carbomethylcellulose sodium, lactose monohydrate, magnesium stearate, xylitol

Recommended Dose

Adults: At the first sign of symptoms, take one tablet allowing it to dissolve under the tongue. If symptoms persist, take one tablet two or three times during the day. If symptoms continue to persist after three days, discontinue use and seek advice from a healthcare practitioner.

Children: Divide tablet in half and follow adult directions.

**Recommended Dose**

Adults and Children (over 12 years): From each bottle, take 5 drops three times daily or as recommended by your healthcare practitioner. See individual product packages for risk and ingredient information. Take 15 minutes before or after ingesting food or drink. To maximize results, avoid intake of coffee, tea or any products containing mint.

Other medications may be taken while using Biotherapeutic Drainage™ Immune Support; however healthcare practitioners should review the contents of each bottle to ensure applicability to individual patients.

For optimal results, take Biotherapeutic Drainage™ Immune Support twice per year, or as recommended by a healthcare practitioner.

No special diet is required in order to obtain effective results with Biotherapeutic Drainage™ Immune Support; however, to maximize results, please refer to directions as recommended by a healthcare practitioner.
