October 2018

Dear Valued Customer,

**Re: Fungisode – Formulation Update**

Thank you for ordering GENESTRA BRANDS® Fungisode. We are continuously working to improve our formulations based on client feedback and information generated from our quality assurance programs. We are pleased to inform you of revisions made to GENESTRA BRANDS® Fungisode. Please note that no changes have been made to formulation active ingredients.

- **Updated Packaging**
  - Change to packaging / bottle from 1oz (30mL) amber glass with removable pipette-type dropper closure to 1oz (30mL) amber glass Boston Round bottle with integrated dropper insert and tamper-evident neck band
- **Formulation revision**
  - Increase in alcohol content from 20% ethanol v/v to 76.6% v/v for improved microbial control

Both packaging and formulation changes help to ensure ongoing product safety throughout the shelf-life of the product, reduce risk of microbial contamination and product security.

Helping to support your practice includes the continuous improvement of the product experience and overall patient compliance. We are confident that you will continue to experience great results with the revised formulation. Continual client feedback is an important component of this process, helping to ensure product superiority and reliable results for your patients. Feel free to contact Seroyal customer service or your sales representative at any time to provide your input.

Thank you for your continued support.
