

We're making strides toward a greener planet.

We are proud to announce our big leap forward to a more sustainable future as we reimagine recycling. From today on, the majority of items we use to package our products are now fully recyclable through TerraCycle®'s **Pure Encapsulations® & Beyond Recycling Program**.

TerraCycle® has discovered that nearly everything we touch can be collected and recycled. Their easy-to-follow national programs allow consumers like you and your patients to recycle typically non-recyclable packaging from Pure Encapsulations®, Douglas Laboratories®, Klean Athlete®, Genestra Brands®, UNDA and Wobenzym®, like our bottle closures, liquid droppers, sachets and blister packs, to name a few.

Together, we can eliminate the idea of waste through this innovative, national recycling program.

What can you recycle through TerraCycle®?
