

Gentle detoxification

Help your body eliminate toxins naturally

Why use Biotherapeutic Drainage™ Liver and Kidney Support*?

The liver and kidneys both help to clear toxins from the body. However, as toxins begin to accumulate in these organs over time, their detoxification ability becomes diminished. Biotherapeutic Drainage™ Liver & Kidney Support* strengthens the liver and kidneys' capacity to overcome toxin accumulation, and rebalances the body's natural toxin elimination process.

How is Biotherapeutic Drainage™ Liver and Kidney Support* different from regular detox?

Detoxification usually works by “stressing” the body into the maximum limits of its detoxification ability. Biotherapeutic Drainage™ Liver & Kidney Support* is a more “gentle” detox, and helps to restore the liver and kidneys' toxin elimination ability back to their normal levels.

Biotherapeutic Drainage™ Liver and Kidney Support* is a convenient 3 week program that boosts energy while gently detoxifying.

Each Liver and Kidney Support Package Includes:

- **UNDA Numbered Compound 1**
Supports liver function and acts as a kidney anti-inflammatory*
- **UNDA Numbered Compound 20**
Acts as a kidney anti-inflammatory*
- **UNDA Numbered Compound 243**
Provides liver pain relief and intestinal purging*
- **GENESTRA BRANDS Phyto-gen: Black Currant Bud**
Provides phytoembryotherapy support†

Recommended Dose: Adults and Children (over 12 years): From each bottle, take 5 drops three times daily or as recommended by your healthcare practitioner. See individual product packages for risk and ingredient information. Take 15 minutes before or after ingesting food or drink. To maximize results, avoid intake of coffee, tea, or any products containing mint.

Other medications may be taken while using Biotherapeutic Drainage™ Liver & Kidney Support*, however a healthcare practitioner should review the contents of each bottle in order to ensure applicability to individual patients.

For optimal results, Biotherapeutic Drainage™ Liver & Kidney Support* should be taken twice a year, or as recommended by a healthcare practitioner.

No special diet is required in order to obtain effective results with Biotherapeutic Drainage™ Liver & Kidney Support*. However, to maximize results, please consult a healthcare practitioner. Physical effects will vary, and are dependent on the health status, amount of toxin accumulation, and sensitivity of individual patients.

* Based on the Materia Medica.

† Phytoembryotherapy is a traditional medicine. Traditional medicine represents the sum total of knowledge, skills and practices based on the theories, beliefs and experiences indigenous to different cultures, used in the maintenance of health, as well as in the prevention, diagnosis, improvement or treatment of physical and mental illness. This definition is based on the one used by the World Health Organization Traditional Medicine Program.

Leaders in homeopathy for over 50 years

UNDA brand is renowned for manufacturing exceptional homeopathic products. UNDA uses only the purest ingredients, such as herbs that are either biodynamically grown (using sustainable organic agriculture) or wildcrafted (harvested from the wild, instead of farmed).

GENESTRA BRANDS Phyto-gens are used in phytoembryotherapy support, which involves creating plant remedies from the fresh buds and young shoots of growing plants. Phytoembryonic plant tissues contain plant “meristem cells”, which contain beneficial phytochemicals in higher concentrations than in mature plants. These phytochemicals include polyphenol and flavonoid antioxidants, plant enzymes, and other active ingredients.
